Our Company

Hospitality Fit-Out

AA Corporation is the number one interior fit-out company in Vietnam, with an established reputation for consistent delivery of cutting-edge interior services within the hospitality market. Possessing an expert interiors team with extensive fit-out experience, we pride ourselves in providing the highest quality services for the most prestigious hospitality projects in Vietnam and Overseas.

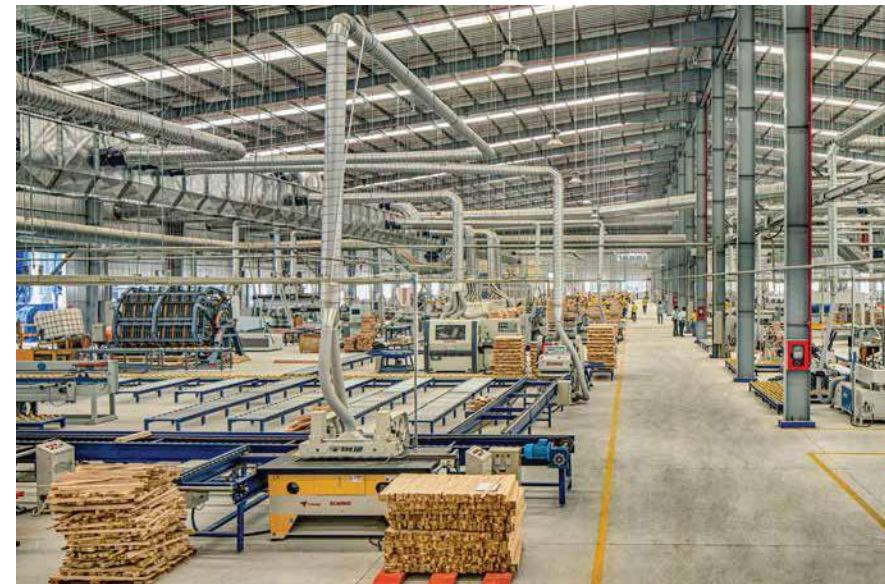

By consistently achieved high level of quality in bringing inception to completion and defeating many challenging deadlines, we have built strong relationships and gained trust of famed designers in the industry. Moreover, our ability in decision making and strong partnership with our customers, designers and project management team, has enabled us to ensure that every project is completed with success and beyond expectations.

Hospitality Furniture

In order to become a one-stop shop for hospitality interior needs, AA Corporation constructed a factory in 1996 and began producing customized furniture. Since then, we have expanded our operation, which now includes four factories spread throughout Asia.

Over the last two decades, AA factories have grown to become one of the highest quality manufacturing facilities in Asia. We have also expanded our customer base to The USA, The Caribbean, The Middle East, Asia and Asia Pacific Regions. Our clients include the world's top five-star hotel groups such as Accor, IHG, Marriott, Hilton, Hyatt, Kempinski, Rosewood, Dusit, Four Seasons and Shangri-La. With over 200,000m² of production space and 2500 skilled workers, we can produce a full range of furniture items with the highest standard of finishes, exceptional craftsmanship and with an outstanding sharpness to detail. AA strives to become the number one interior contracting and hospitality furniture manufacturer in South East Asia.

Our Commitment

Our Commitment

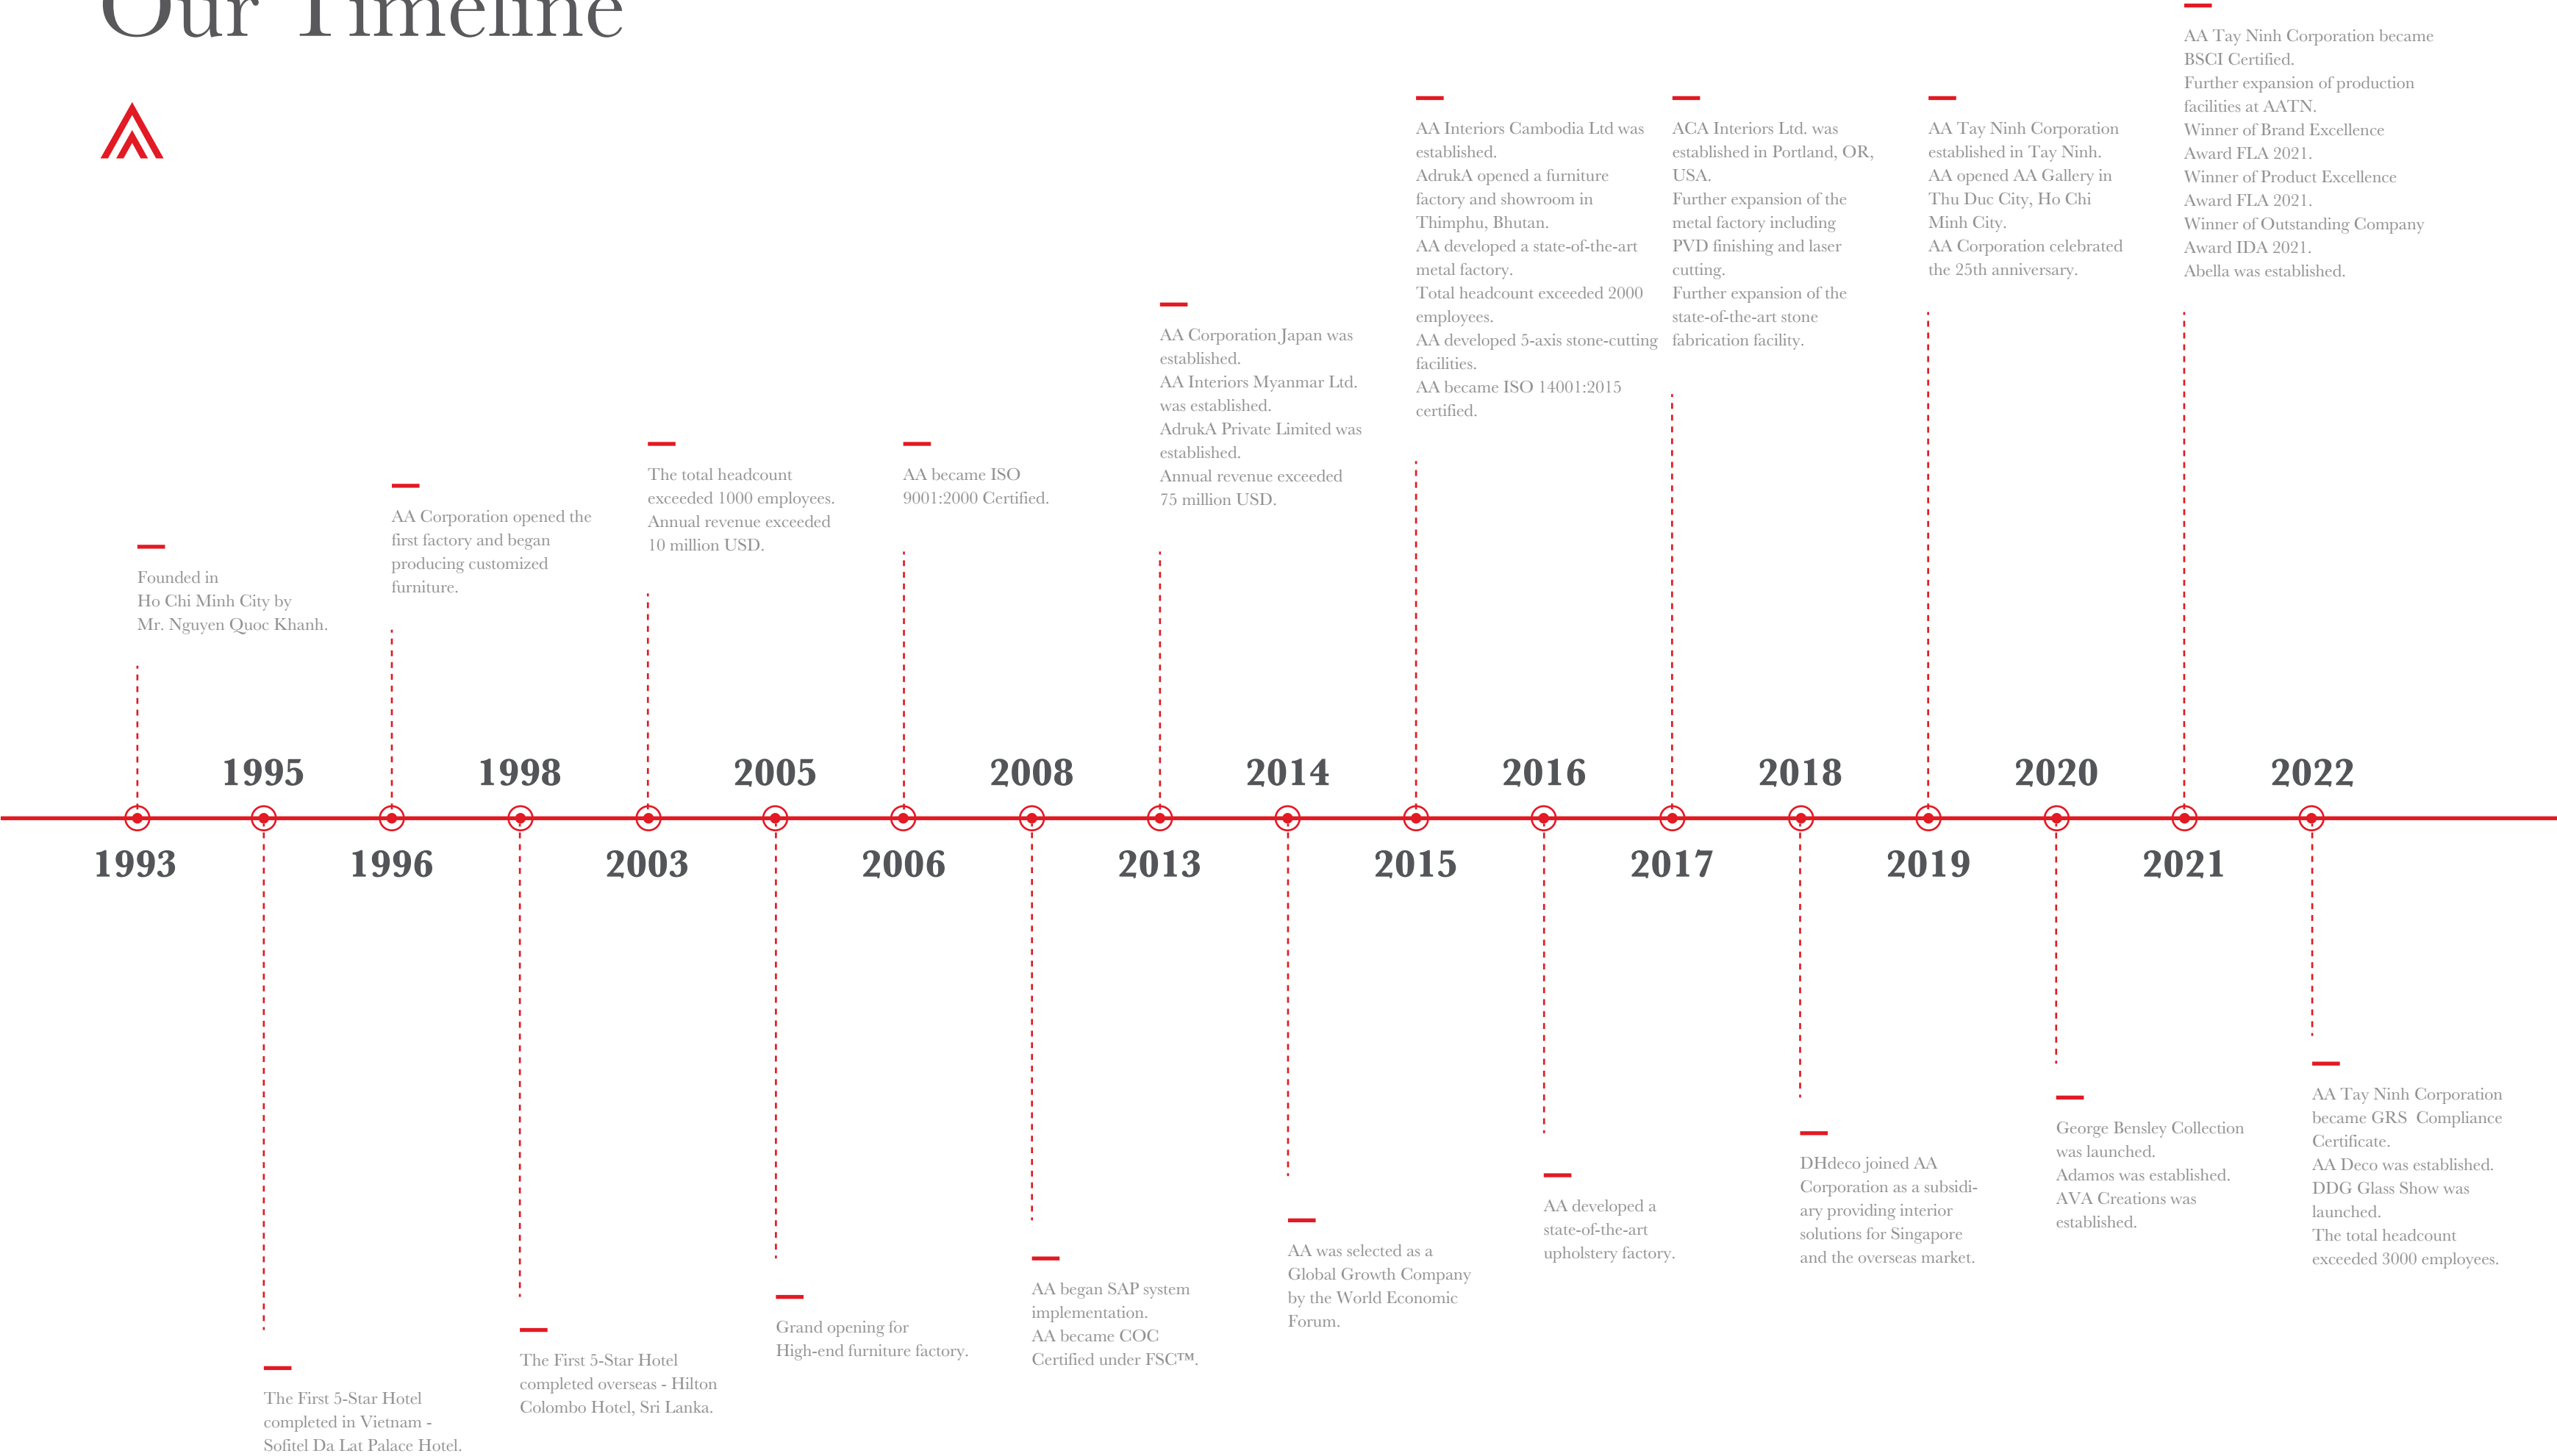

- To satisfy our customers demands by providing unique products and professional services for interior hospitality projects
- To be a group of creative and ambitious individuals that can add value to our customers, our partners and the community
- To develop a corporate culture of professionalism and innovation, with a burgeoning desire to achieve perfection
- To continuously strive to lower our customers costs whilst striving to ever increase our quality and standards
- To be the number one hospitality focused interiors contracting company and custom furniture manufacturer in Vietnam and Internationally

Manufacturing

—

Our factories

AA Corporation first commenced construction of our factory in 1996 . The initial setup and focus was for the production of bespoke millwork and furniture products. Since then, our factory campus has grown to incorporate a variety of production processes into one central location, creating a large-scale custom workshop, capable of manufacturing a vast range of high quality custom products within a short timeline. Attention to detail and excellence in craftsmanship have enabled AA Corporation to collaborate with some of the world’s leading hotel designers, developers, and operators. AA Corporation is truly a “one stop shop” for hospitality furniture projects.

AA Manufacturing Division is made up of two modern production facilities:

- **AA Tay Ninh Corporation**
Tay Ninh, Vietnam
- **Adruka factory**
Thimphu, Bhutan

AA Tay Ninh

- AA Tay Ninh is located in Trang Bang district, Tay Ninh Province, Vietnam
- AA Tay Ninh factory is 500,000m² total, phase 1 completed 175,000m² of indoor manufacturing space.
- More than 2,500 skilled workers
- Expert teams of interior specialists with more than 25 years of experience
- AA Tay Ninh has exported to more than 40 countries and cities worldwide
- ISO 9001:2015 and ISO 14001:2015 Certified
- COC Certified to produce FSC products
- Business Social Compliance Initiative (BSCI) Certified
- AA factory runs SAP and Solidworks

AA Tay Ninh factory campus includes:

- Solid Wood facilities
- Veneer Panel facilities
- Metal Works facilities
- Stone Works facilities
- Finishing Works facilities
- Upholstery facilities
- Laminate facilities
- Artisanal Trades (Marquetry, Carving, Painting, Weaving)

Timber / Veneer

AA Corporation began manufacturing solid wood furniture in 1994 and continues to produce exquisite custom timber furniture. Our factory utilizes both native Vietnamese grown timber such as Mahogany or Acacia, in addition to a variety of woods that are imported from overseas. AA Corporation also keeps stock of Oak, Teak, Walnut, Cherry, Maple, Ash and other timber commonly used in the production of furniture. Depending on the final destination of the furniture products, AA Corporation will custom dry the timber to ensure our products are stable and fit for purpose in the environment that they are installed.

Veneer panels are used for a variety of products. Our manufacturing team hand selects the finest timber veneers prior to production, ensuring that all materials meet the AA standard of quality. Veneers are then matched, edge glued, and pressed within AA factory to ensure that every panel meets our client’s expectation.

Wood Finishing

PANEL FINISHING

For all flat surface panel products, AA Corporation uses an automated flat panel finishing conveyor to execute an even and consistent finish. The panel conveyor utilizes two robotic finishing arms that ensure all products receive a consistent layer, whilst also safeguarding against overspray and other potential inconsistencies.

CONVEYOR FINISHING

Conveyor finishing is used to control the quality, drying time and consistency of products when produced in large batch quantities. Our machines can handle both large and small quantity items with state of the art dust free control centers for the application of final top coating.

Metal Fabrication

With the recent expansion of our metal factory capabilities, we are able to offer wider services which include custom fabrication of stainless steel, steel, aluminum fixtures, furniture & decorative hardware. Total machinery investment for metal factory is more than 5 million USD.

AA Corporation has invested in a state-of-the-art metal fabrication facility, which includes automated machining of metal components, robotic welding of joints and PVD plated finishes. All metal items are cut on our water jet CNC machines as well as fiber laser cutter to ensure that the precision meets our internal standards.

METAL FINISHING

AA Corporation uses state of the art PVD finishing technology for the plating of all metal products. PVD coating deposits thin films by a condensation of a vaporized form of the desire film material onto various work piece surfaces to ensure highly durable finishes, rust free as well as highly consistent quality when mass-produced. This also includes anti-fingerprint technology to all required metal surfaces.

Stone & Glass

AA Corporation fabricates all stone and glass products in house on our state of the art Italian CNC machines. CNC machining center is designed to work with ultra-thick slabs and blocks of stone materials accurately and speedily. In its standard configuration, it can perform any types of rough or polished edge contouring and surface machining, as well as any milling, drilling, countersinking, emptying, and inscribing.

With the new glass fabrication facility, we are able to cut and polish a wide range of glass products in house to avoid outsourcing, therefore increase time, reduce costs and increase precision.

Upholstery

AA Corporation manufactures a variety of upholstery items for custom hospitality projects. Upholstery frames are developed and tailored to meet the requirement of each individual project and are constructed based on the request of the designer. Our dedicated team of sewing technicians are trained in stitching for furniture, cushions, curtains and drapery products. Our upholstery factory utilizes machines specialized in the sewing of both fabric and leather with high precision. AA Corporation uses numerous foam types in the production of

our upholstery products. Foams ranging in density and hardness are cut to measure in order to achieve the “perfect sit” for the designer’s requirements. We are also experienced in the use of down and feather for cushion and pillow products. We only ever use fire resistant foams that are certified to meet the requirements of the latest international fire regulations and standards.

Artisanal

AA Corporation employs a dedicated marquetry team who are trained in the selection, matching and joining of decorative veneers for furniture making. From book matching to decorative motifs our team is capable of executing any custom design. Our furniture are finely detailed and beautifully hand crafted, hand painted by our skilled artists that no machine can execute. Each piece of furniture is handled with care, dedication and inspiration in order to deliver not only a product but also a work of art.

Painting

AA Corporation offers the finest hand-painted custom furniture in various styles, whether it is a traditional Vietnamese motif or Neo-classical details, our artists are capable of expressing the designer’s ideas intricately onto various pieces of furniture.

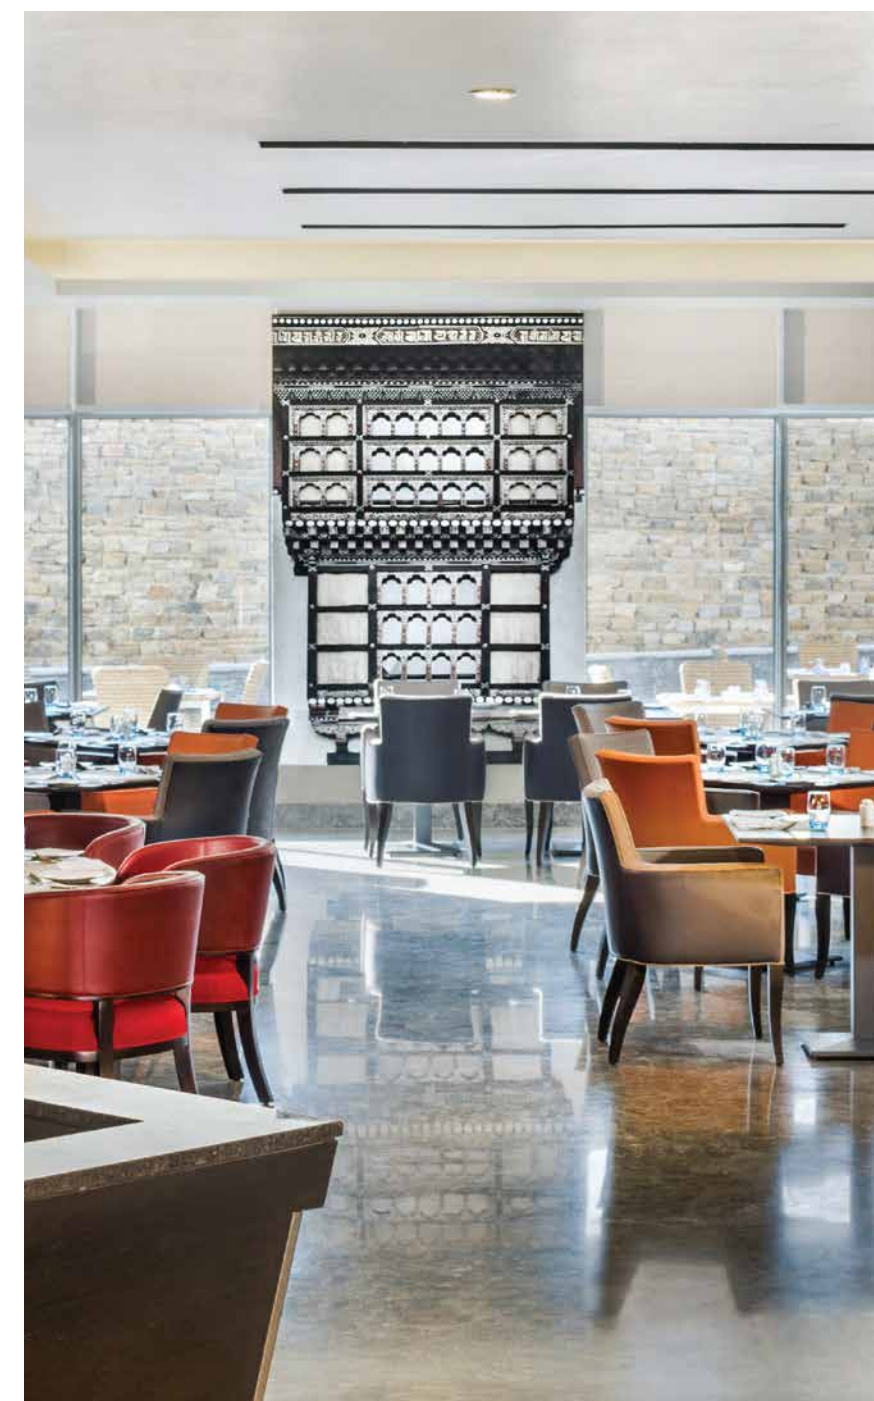

Established in 2012 in Thimphu, Bhutan, Aduka provides interior products and services to the blossoming hospitality market in Bhutan. Aduka's goal is to become the leading interior fit out company in the Kingdom of Bhutan, with a reputation for consistent delivery of cutting edge interior services and providing the highest quality hospitality products.

Aduka has constructed a brand new manufacturing facility within the picturesque mountain region of Thimphu, and positioned 3200m above sea level. The factory is currently manufacturing custom millwork, cabinetry, upholstery and furniture products throughout Bhutan and surrounding countries.
